

SUPPORT FOR Gifted & Talented Identification & Data

Looking to improve your school's
procedures for identifying gifted and
talented students?

We can help!

Data-Driven Identification for Gifted & Talented Services

Equip your teachers to serve the students most in need of advanced learning opportunities through our data-driven, comprehensive identification support. As indicated in Chapter 59 of the Iowa Administrative Code, AEA staff cooperate with school districts in the identification and placement of gifted and talented students by assisting with the interpretation of assessment data and development of an identification plan.

Time/Cost Estimates

Districts who request this support annually will incur less expense, as initial setup will already be completed. For a district just beginning this work, approximate AEA consultant time required includes:

- Initial consultation and data setup | 1 day
- Creation of data dashboard | 1 day
- Meeting with district personnel to train on dashboard use | ½ day
- Ongoing data updates | ½ day when needed

Custom Plans

Collaboration with district personnel to explore available assessment data, choose identification service areas and determine goals.

Data Hub

Development of a central hub spreadsheet and corresponding Looker Studio display, using all data points for all students and Z-score analysis.

Ongoing Updates

Updating student rosters and adding assessment data as it becomes available throughout the school year.
