

AEA Technology Services: Cybersecurity

Your trusted partner for creating a safe, cyber-resilient school district.

Just as a personal trainer helps you build strength and endurance to protect your body from injury, Iowa's AEAs collaborate with districts to strengthen their defenses against cyber threats through awareness, safeguards, and continuous improvement.

- ✓ Assess vulnerabilities.
- ✓ Provide ongoing support to stay fit and resilient in an ever-evolving digital landscape.

Complete Package

Ready for an All-In-One Solution?

Elevate your school district's security posture with the **Complete Package**, a comprehensive suite of tools and services. This package is crafted to maximize savings through bundled services while delivering unmatched security coverage.

With the **Complete Package**, you'll ensure ongoing improvement. Strengthen your defenses, safeguard student and staff data, and future-proof your district with a solution that goes beyond meeting requirements—it's about creating a secure, resilient environment in multiple areas of cybersecurity: email protection, endpoint protection, pentesting, credential protection, patch management, assessment, and consulting.

Invest in the **Complete Package** today and secure your district's digital future.

Assessment Package

Start Strengthening Your School District's Cybersecurity

For districts that haven't historically invested in cybersecurity but know it's time to start, the **Assessment Package** offers the perfect entry point.

The 2-month **Assessment Package** provides invaluable insight into your current security status, along with guidance on what's needed next. You'll gain a comprehensive understanding of the critical steps your district must take to protect student and staff data and fortify your digital defenses.

Invest in the **Assessment Package** today for a low-risk, high-value exploration that will set your district on the right path toward a secure future.

As a follow-up, it is highly recommended that the district invest in one or more **Protection Packages (Email, Infrastructure, or Compliance)**.

Core Package

A Step Toward a Stronger Cybersecurity Posture

The **Core Package** is designed for districts that need a strategic approach to securing their data while making the most of available resources.

This essential risk assessment provides you with an initial, condensed core assessment and helps paint the big picture of your district's cybersecurity needs. Gain valuable insights and a clear roadmap for prioritizing future investments, ensuring your district's digital defenses are strong without overspending.

Take the first step today with the **Core Package**—a smart, basic investment in your school district's secure future.

As a follow-up, it is highly recommended that the district invest in one or more **Protection Packages (Email, Infrastructure, or Compliance)**.

Services beginning as soon as January 1, 2025!
