Outsourced IT Service

Successful educational technology implementation is a complex endeavor. Your district puts considerable resources towards providing consistent and reliable technology for use by your staff and students. The AEA's Outsourced IT Services can help your district get the most out of those resources.

Successful educational technology implementation is not limited to ensuring the functionality of your technology. The vision, planning, and alignment to your technology infrastructure are all key components to an effective and impactful system. Partnering with Iowa's AEAs is a great way to combine all of the variables that lead to a successful system.

Affordable, Complete Technology Services When You Need Them.

Our outsourced IT service will provide you with remote and on-site services when you need them at a cost lower than what you would spend to staff in house.

This full service solution includes management of your:

- ✔ network infrastructure,
- ✔ management of devices,
- ✔ planning,
- ✔ vendor management,
- ✔ on-site backup,
- ✔ Google Apps management
- ✔ and more.

Cost is custom to each district based on your infrastructure and devices.
Contact us for a custom proposal for your district.
